EDUCATION

University of British Columbia, Vancouver, BC Canada
Bachelor of Applied Science – Mechanical Engineering

September 2025 – April 2028

Southern Alberta Institute of Technology (SAIT), Calgary, AB Canada
Diploma – Mechanical Engineering Technology

September 2022 – April 2024

Awards: Gene Haas Foundation Award, George Klassen Memorial Award, Calgary Pump Symposium Award, Honours List
Completed bridging program to UBC 2024–2025 at Camosun College in Victoria, BC

SKILLS

CAD & Software: SolidWorks, FEA, Fusion 360, AutoCAD, Autodesk Revit, MATLAB, Python, Arduino

Fabrication & Prototyping: Machining (Lathe, Mill, CNC, Laser Cutting), Welding (TIG & MIG), 3D Printing & Rapid Prototyping

Technical Knowledge: GD&T, Design for Manufacturability (DFM), Design for Assembly (DFA), P&ID Schematics, ASHRAE Standards, Assembly & Mechanical Drawings

Project Coordination: Equipment Procurement, Budgeting, Shop Drawing Reviews, Change Order & RFI Processing

EXPERIENCE

DIALOG, Calgary, AB Canada

January 2026 – Present

Mechanical Engineering Student – Intern

- Developed mechanical system specifications, schedules, and sheet layouts for HVAC, plumbing, and piping systems, ensuring 100% compliance with project requirements and building codes
- Developed Excel-based calculators for duct sizing, pipe sizing, and valve control authority verification per ASHRAE standards, now used across the mechanical team
- Conveyed design scope for construction tender by producing high quality mechanical drawings, P&ID schematics and equipment details
- Created BIM models in Autodesk Revit to perform engineering calculations and clash detection, improving cross-functional coordination across mechanical, electrical, and architectural disciplines and reducing design conflicts by 15%
- Performed constructability assessments by reviewing equipment cut sheets and shop drawings for fans, pumps, and plumbing fixtures to verify compliance with mechanical design specifications and codes
- Created assessment reports on mechanical building components including equipment selections, sizing validation, and compliance documentation

Modern Niagara, Calgary, AB Canada

April 2023 – August 2023

Project Coordinator – Intern

- Provided production coordination across 5 concurrent mechanical projects valued at \$2M+, tracking schedules and execution to ensure on-time completion and adherence to quality standards
- Prepared status updates and tracked workflow priorities with lead project manager, contributing to maintaining profit margins above 10% on each project
- Coordinated procurement and issued purchase orders for mechanical equipment, securing delivery 2–3 weeks ahead of installation deadlines

Lethbridge Integrity Roofing LTD, Lethbridge, AB Canada

April 2020 – September 2022

Assistant Manager

- Developed quotes, scheduled projects, and managed up to 3 on-site teams
- Performed QC inspections resulting in 100% client satisfaction
- Processed \$700,000+ in customer payments and maintained accurate financial records
- Drove a process improvement initiative to automate quotation workflows, reducing admin and estimation effort by 40%

PROJECTS

GrimRipper – Roofing Tool

- Personal project where I designed and prototyped a lightweight roofing removal tool (~52% lighter than current tools available)
- Iterated 8 designs via FEA stress simulations in SolidWorks, achieving minimum safety factor of 1.5 for highest concentration load
- Built working prototypes using laser cutting, sheet metal bending, and welding

Mustang Brake Conversion Kit

- Led a 4-member team through a 14-week capstone project, delivering a custom drum-to-disc brake conversion kit for a 1966 Mustang V6 under a \$450 budget
- Developed 3D CAD models and detailed engineering drawings using SolidWorks, integrating custom and 3D scanned aftermarket parts, validating the design with FEA-backed safety factor of 6+
- Applied GD&T tolerancing across 15+ custom and aftermarket components, ensuring compatibility with OEM mounting geometry

VOLUNTEERING

Chinook Hospital AHS, Lethbridge, AB

May 2018 – May 2019

In-Patient Care Volunteer

- Provided comfort and emotional support to in-patients and seniors, fostering positive connections within the care environment
- Collaborated with medical staff to support daily ward operations, contributing to a smooth and positive patient experience
